Forecast for Saturday 24 Jun 2023

Weather: Light and intermittent rain or drizzle lasting until the middle of the day before dying out. Cloud thinning and breaking, to allow increasing sunny spells, with exposed southwest facing aspects last to clear. A fine clear sunny end to the day with clear skies after dusk.

Chance of cloud-free hill tops above 800m: Little chance in morning then steadily improving to more than 90% through the afternoon

Low cloud and visibility: Extensive low cloud at 450-750m with some lower banks at first in areas exposed to the southwest, bringing very poor visibility. Gradually lifting and breaking in the afternoon. Away from the cloud, poor visibility locally in drizzle but becoming generally good.

Meteorologist's View

Generally humid, and becoming warm at lower levels

Forecast for Sunday 25 Jun 2023

Weather: The morning will be dry with sunny spells and becoming very warm. Then a band of cloud and heavy, thundery rain will cross from the west during the afternoon. This then clearing to allow a mix of sunny intervals and further showers perhaps heavy and thundery. Hail is a possibility.

Maximum wind: Southerly 30 gusts 40mph veering westerly easing 20 gusts 30mph. Perhaps some squally gusts near thunderstorms.

Chance of cloud-free hill tops above 800m: 90% in morning then falling 40%.

Low cloud and visibility: No low cloud at first, with good visibility, then cloud forming at 600-900m with lower patches in the thundery rain and at times in the showers.

Temperature: **Valleys:** Plus 16 rising to Plus 23 Celsius by early afternoon, dropping a few degrees in the thundery rain, then down to 14 by midnight.

At 800m: Plus 12 Celsius, falling to Plus 8 during the evening.

Freezing level: Above the summits.
